Offshore Installation Services

SUBSEA TECHNICAL SERVICES

Delmar supports the offshore industry from both drilling rigs and anchor handling vessels (AHVs), eliminating the reliance on costly derrick barges and multi-service vessels. Delmar uses proven methods and standard rigging equipment to minimize the burden of equipment procurement on routine project execution.

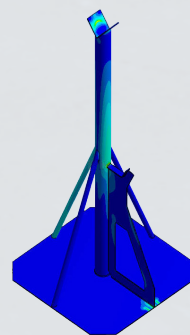

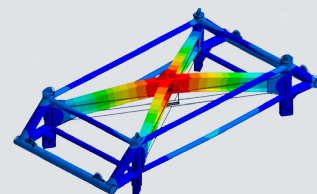

Delmar provides a team of proven engineers and offshore personnel. A combination of innovative thinking and offshore experience has allowed Delmar to lead the industry in safe, efficient subsea solutions.

Specialty Services:

- Project Management
- Front End Engineering
- Systems Engineering
- Subsea Component Installation
- Specialty Equipment Design & Fabrication
- Offshore Installation Services
- Decommissioning
- Intervention, Repair, and Maintenance (IRM) Services

Engineering Capabilities

Delmar's engineering and fabrication experience allows us to develop specialized equipment that has been tested and certified to industry standards.

- Production Equipment Parking Piles
- Pipeline Initiation Piles
- SCR Holdback Piles
- Manifold Lift Frames
- Suction Piles
- Jumper Installation Systems
- Production Equipment Load Plates
- Overboarding Skid Plates

Subsea Systems Installation and Recovery

Delmar offers a variety of open water and MODU-assisted subsea installation and recovery services including the Heave Compensated Landing System (HCLS), which provides a safe, efficient, and cost-effective method for installing and recovering subsea production equipment from traditional AHVs.

- Subsea Production Christmas Trees
- Oil and Gas Gathering Manifolds
- Control Systems
- P&A Support for Depleted Developments
- IRM Hardware

Project Management

With over 40 years experience in the offshore industry, Delmar can effectively manage your subsea project from planning to scheduling to implementation, meeting your needs and goals.

Equipment Supply

Delmar has a large inventory of certified rigging that is used in our offshore construction program to provide the highest level of assurance for you and our own personnel. Delmar's equipment meets stringent inspection requirements and is constantly under review to ensure our equipment is fit for purpose.

Safety and productivity are inseparable. A project completed safely will be efficient and profitable for all parties involved.
